SHANNON A. SMITH

IT Support | Cybersecurity | Systems & Application Support | Process Improvement

Durham, NC | 919-475-0777 | shannon.a.smith1223@gmail.com | LinkedIn | Portfolio | GitHub | Credly

PROFESSIONAL SUMMARY

IT and cybersecurity professional and U.S. Navy veteran with a Master of Information Technology from Virginia Tech and experience in technical support, systems troubleshooting, and IT service delivery. Holds industry certifications including CompTIA Security+ and GIAC Security Essentials (GSEC), with hands-on cybersecurity training in security operations, threat detection, and incident investigation. Combines technical problem-solving, operational leadership, and process improvement to support reliable and secure technology environments.

TECHNICAL SKILLS

IT Service & Application Support: Freshdesk, ticket triage, technical troubleshooting, Moodle, Drupal, SOP development
Security Operations & SIEM: Splunk, log analysis, alert triage, incident investigation, threat hunting
Scripting & Automation: Python, PowerShell, Bash, log parsing, workflow automation
Networking & Security Tools: TCP/IP, DNS, Wireshark, Zeek, Snort, Nmap, Burp Suite, Nessus, Metasploit, CyberChef, Hydra
Systems & Virtualization: Windows 10/11, Linux (Ubuntu, Kali), VMware, Docker
Frameworks & Concepts: MITRE ATT&CK, incident response lifecycle, least privilege, defense-in-depth, vulnerability management

CERTIFICATIONS

- GIAC Security Essentials Certification (GSEC) | Jul 2026
- GIAC Foundational Cybersecurity Technologies (GFACT) | Mar 2026
- Certified Ethical Hacker (CEH) | Jun 2025
- UiPath Certified RPA Associate | May 2025
- Splunk Certified Core Power User | Mar 2025
- CompTIA Linux+ | Feb 2025
- CompTIA Security+ (DoD 8570/8140) | Dec 2024
- CompTIA A+ | Dec 2024

In Progress:

- GIAC Certified Incident Handler (GCIH) | target Nov 2026

TECHNICAL & LAB EXPERIENCE

SOC Detection & Investigation Pipeline | GitHub Portfolio

- Developed a three-phase SOC project progressing from automated alert triage to MITRE ATT&CK mapping and a stateful investigation agent that evaluates supporting evidence and assigns confidence scores.
- Integrated hybrid TF-IDF, embedding-based, and rule-based scoring approaches to map security findings to MITRE ATT&CK techniques
- Phase repos: Alert Analyzer | ATT&CK Mapper | Agentic Engine

Selected Investigations & Labs | Cybersecurity Portfolio

- Analyzed Linux authentication and enterprise DNS logs in Splunk to trace attacker activity and identify suspicious access patterns.
- Conducted network and web application enumeration using multiple security tools to investigate potential unauthorized access paths.
- Researched NotPetya, Wizard Spider, and Uber/Lapsus$, documenting attack chains and threat actor techniques.

WiCyS / SANS Security Training Scholarship | Sep 2025 – Present

- Progressed through the scholarship's five learning tiers, from foundational CTF exercises and TryHackMe labs through SANS SEC275/GFACT, SEC401/GSEC, and SEC504/GCIH training.
- Completed SEC275 and SEC401, covering foundational cybersecurity technologies, networking, cryptography, system security, defensible network architecture, and Windows/Linux hardening.
- Currently completing SEC504/GCIH training in incident handling, computer crime investigation, and attacker techniques.
- Applied skills through hands-on labs in Ranges.io and TryHackMe, including forensics, web vulnerabilities, and privilege escalation.

Intellectual Point Cyber Security Expert Program | Oct 2024 – Aug 2025

- Completed 540 hours of hands-on training in security operations, network defense, and systems administration.
- Practiced security monitoring and alert triage with Splunk SIEM, vulnerability assessment, and simulated incident investigations using Kali Linux and Burp Suite.
- Configured and hardened Linux systems and applied networking and access-control fundamentals in lab environments.

NPower Information Technology Training Program | Aug 2024 – Dec 2024

- Installed, configured, and troubleshot Windows, Linux, and macOS systems in training environments, addressing hardware, software, and peripheral issues.
- Applied TCP/IP, port, protocol, and connectivity troubleshooting fundamentals to diagnose system and network issues.
- Completed CompTIA ITF+ and A+ coursework alongside Google IT Support training.

PROFESSIONAL EXPERIENCE

Technology Support Specialist | UNC School of Social Work | Oct 2026 – Present

- Provide technical support for the NC Certified Peer Support Specialist (NCCPSS) Program through the Freshdesk ticketing system, resolving applicant account access, password, and duplicate-account issues.
- Support the program's Moodle learning platform and Drupal-based website, reviewing the site for information gaps and discrepancies that drive applicant tickets.
- Building a Standard Operating Procedure and scenario log for applicant tickets to standardize responses and identify recurring issue areas.
- Proposing Freshdesk workflow improvements, including ticket types for routing, status rules for Pending/Resolved/Closed, and alerts for unanswered tickets.

Property Manager | Lampe Management Company | Jul 2009 – Jan 2022

- Utilized SiteLink (SaaS property management platform) daily for tenant accounts, billing, and reporting — hands-on exposure to day-to-day SaaS platform operations.
- Managed tiered access control (gate and keypad tied to tenant billing status) and coordinated a multi-vendor stack (fire alarm, elevator, HVAC, cameras, pest control) — identifying issues and routing them to the right vendor.
- Authored Standard Operating Procedures from scratch, including vendor escalation paths and incident reporting, where none existed before.
- Reduced past-due accounts by 52% and increased revenue by 30%, while maintaining near-100% occupancy across 120,000+ sq. ft. of commercial property.

Operations & Logistics Coordinator | Queen of Wines, LLC | 2017

- Coordinated inventory tracking, financial records, and vendor operations.
- Improved workflow accuracy and efficiency.

Technical Operations Supervisor | U.S. Navy | Aug 2004 – Aug 2008

- Led and supervised 20+ personnel in technical operations, maintenance, and troubleshooting for mission-critical equipment.
- Directed incident response and preventative maintenance to sustain high system availability under operational pressure.
- Built training programs that achieved a 100% team qualification rate.

EDUCATION

- Master of Information Technology | Virginia Tech | 2023
  Graduate Certificates: Software Development, Cybersecurity Policy
- B.S., Technical Management | DeVry University | 2017

PROFESSIONAL AFFILIATIONS

- Member, Women in CyberSecurity (WiCyS)
